Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamy.

Hamy shows a passenger seat which inherently may be used in an amusement park installation comprising a holding device (12,18,20) provided with retaining means (18,20) including a harness (18) for holding the top of the body of the passenger in the seat and thereby encircling the body of the passenger so as to prevent any risk of ejection of the passenger during travel, the seat further comprising a support (14,15) supporting a seat base (15) fixed on the support, wherein the seat comprises a device (16) for locking the legs of the passenger, wherein the device comprises two flaps (16) mounted at an end portion of the support for articulation between an open position and a closed position, wherein the flaps co-operate with portions of the seat base so as to encircle (the top portions of a users) legs of the seated passenger in the closed position. Hamy further shows the flaps having lateral parts projecting below the base (in an up position) and serving for the lateral holding of the legs of a passenger (see Fig. 5), the lateral parts being arranged to cooperate with the flaps for locking the legs of the passenger. A mechanism (44,48,52) for actuating the movement of the flaps and having members acting on levers (the long portion of the arm 16) fixed to the flaps (the curved portion of the arm 16).

Allowable Subject Matter

3. Claims 19, 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable over the prior art made of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 20-25, and 19 are allowed over the prior art made of record.
